Professional Summary

Software Engineer with 6+ years of experience building scalable platforms, APIs, and full-stack applications. Proven track record in platform architecture, end-to-end system ownership, and delivering high-impact engineering solutions across millions of users. Strong expertise in API development, database optimization, and full-stack engineering. Active open source contributor currently contributing to public repositories, demonstrating commitment to software engineering beyond professional work. Experienced in owning platform infrastructure, implementing automation frameworks, and architecting systems for scale.

Core Competencies

- **Platform Engineering:** Full-stack development | System architecture | API design & integration | Platform scalability | Infrastructure ownership
- **Technical Stack:** JavaScript | React | Java | SpringBoot | SQL | HTML5 | CSS | REST APIs | Git | AMPScript
- **Data & Systems:** SQL | Data modelling | Data visualisation | Automation workflows | Metrics & reporting
- **Engineering Practice:** Code reviews | System design | Documentation | Testing | Refactoring legacy systems | Open source contributor | Cross-functional collaboration

Experience

Marketing Technology Developer **CarTrawler** *Dublin, Ireland* **06/2021 - Present**

- **Platform Architecture & Ownership:** Served as platform engineer and technical subject matter expert, owning end-to-end design, architecture, and optimization of the Salesforce Marketing Cloud platform serving millions of users across 150+ airline partner integrations.
- **Development Framework Engineering:** Architected and implemented a standardized development framework enforcing consistent design patterns and code quality platform-wide. Achieved 40% reduction in development time, faster bug resolution, and significantly improved long-term maintainability.
- **API Development & System Integration:** Designed and implemented REST API integrations between platform APIs and core product systems, enabling personalized user experiences and real-time data synchronization.
- **CRM Campaign Automation:** Architected and delivered marketing automation workflows using SQL and JavaScript, improving the efficiency and accuracy of CRM email campaigns and driving a 14% increase in insurance booking volume.
- **Full-Stack Product Delivery:** Led end to end delivery of 18+ marketing email products and optimised 9 service email products, managing data requirements, partner dependencies, and scalability across a network of 110+ partners. Owned configuration of metrics, alerting, and reporting using HTML, CSS, AMPScript, SQL, Java and REST API.

- **Governance & Data Compliance:** Orchestrated data model enhancements to optimise customer subscription management, establishing governance standards fully compliant with GDPR, enhancing data security and privacy across all marketing and service email products.
- **Email Deliverability & Authentication:** Configured authentication infrastructure (SPF, DMARC) from scratch to establish secure sending systems. Proactively diagnosed and resolved deliverability issues, ensuring high system reliability and protecting infrastructure reputation.
- **Code Quality & System Optimization:** Developed and implemented strategic processes for marketing operations that contributed to a 10% improvement in Net Promoter Score (NPS) and drove growth in gross car bookings. Conducted code reviews and refactored legacy systems to improve reusability, maintainability and long term scalability.

Software Engineer

Physio Needs Ltd.

Dublin, Ireland

09/2019 - 05/2021

- Developed and optimized search components using React, elevating user search experiences and enhancing product discoverability.
- Revamped product components for enhanced visual appeal and functionality and led the development of a quick price filter for efficient user experience.
- Designed and implemented reusable UI code and interfaces, enhancing development efficiency and code maintainability.
- Identified and debugged inefficient code, implementing clean, optimized solutions for enhanced performance and maintainability.
- Conducted regression testing and code quality reviews, maintaining platform stability across multiple release cycles.

Junior Software Engineer

VKC Group

Vapi, India

04/2017 - 05/2018

- Developed and maintained the company website with a focus on responsive design and seamless frontend to backend integration.
- Designated internal subject matter expert for the data analysis team, delivered knowledge transfer sessions and technical onboarding for new team members.
- Collaborated with cross-functional teams to deliver integrated solutions aligned with business objectives.

Education

MSc Digital Marketing

National University of Ireland

Galway, Ireland

09/2018 - 12/2019

- Postgraduate program combining marketing strategy, digital analytics, consumer behavior and data driven campaign management.

Key Achievements

- Active open source contributor to public repositories, demonstrating commitment to software engineering and community collaboration beyond professional responsibilities.
- Recent contributions include security documentation improvements and bug fixes, showcasing ability to understand unfamiliar codebases, identify issues, and collaborate with distributed engineering teams on real-world projects.
